

# Profile

FIU, Student Academic Success Center

FIU's Student Academic Success Center (SASC) is a four-story, 74,000 sq.ft. building that was completed in October 2016 and has been certified as a LEED Silver building. This impressive building sports a futuristic, unique all-glass and concrete look that stands out from every other building on campus, yet very much feels like part of Miami.

Crawford-Tracey's Pro-Tech 7SG and 9SG glazing systems are central to the building's distinctive look and ability to allow natural light to enter the building to maximize day lighting into the interior spaces. Beyond looking great, the Pro-Tech systems also meet Florida's toughest impact requirements for large and small Missile with a water rating of 100psf.

## PROJECT DETAILS
